

Cyberparks finals: Co-creation, big data, and the future of digitally enhanced public spaces

Final Conference of the EU research project COST TU1306 Cyberparks

Date: April 11th and 12th, 2018

Venue: ZK/U, Berlin, Germany, www.zku-berlin.org

Website: <http://cyberparks-project.eu/conference>

Open Call for Contributions: Pecha Kucha Session on design projects at the intersection of digital media and public spaces

Target groups: Researchers, practitioners, artists, designers, and graduating students

To open up and connect the conference to the wider Berliner public, part of the conference is dedicated to the presentation of art, design, research projects and ideas dealing with the intertwining of ICT on the production of public spaces, their use and appropriation. We are looking for sustainable and interesting projects – both already implemented/realized and planned ones, and from design through theoretical to fictional ones – that address the role and impact of information and communication technologies (ICTs) in the production of public space(s). Especially suitable BA and MA design projects are encouraged to apply!

Submission & Selection

The projects are to be presented in a Pecha Kucha session, with a time maximum limit of exactly 6 minutes per presentation. Proposals must include a title, a short CV of maximum 500 characters per presenter, a short textual description (maximum 1000 characters) that gives contextual information about the project and about the motivation of presenting it in the framework of the CyberParks Finals conference in Berlin, and at least one visual representation of the project.

All information regarding the proposal shall be submitted via the web form at the conference website.

From the proposals, a selection will be compiled by a jury consisting of the conference committee members, see on the website.

Deadline & Publication

The deadline for entries is the 13th of March. Selected proposals will be notified until the 20th March.

The presented projects will be published in the pool of examples of the CyberParks project at <http://cyberparks-project.eu/examples>.

Winner Dinner

All successful applicants will be invited for the conference dinner to be held on a boat trip on the Spree on the evening of the first conference day.
