

International Training School in thinking and making hybrid spaces, 29 March - 01 April 2016, Thessaloniki, Greece

ENHANCEMENTS

Mediated Urban Landscapes

The Call for Trainees will be launched on the 4th of January 2016

We are inviting video applications in standard video format from master / phd students in fields related to the shaping and making of technologically enhanced public spaces – from architecture, landscape and interaction design to urban development, sociology, information technology and digital humanities.

Video applications should be successfully registered and uploaded at www.cyberparks-project.eu/ by the 31th January 2016.

In a short 5-6 minutes video, the interested candidates should present their background, interests and work experience as well as few words on their decision to apply at the Enhancements training school with their personal viewpoint on how they imagine the future of the Digitally Mediated Urban Spaces.

Travel expenses, accommodation and subsistence for the participants of the training school will be reimbursed according to the COST regulations.

For more information see our webpage at enhancements.arch.auth.gr and cyberparks-project.eu or contact the organizing committee (contact person: Dr. Konstantinos Ioannidis, email: konionn@aaiko.no)
