

Title

Technologies of Anthropogenic Spaces: co-creation aspects in co-mediated landscapes

Content

Question development: The term *Anthropogenic* of this workshop may strike the participants as rather tautological to man-made outdoor space development. While the term itself captures this sense of human existence, *ICT* and *The Virtual* often fall outside of outdoor spatial composition.

Can technologically mediated spaces have their origin in the activities of man?

Part: *Technology and the Anthropos*

1. Is outdoor technology directed *towards* the human, *towards* his/her activities?
2. Critical inquire of the terms Technology, Anthropogenic and Co-creation
3. Disadvantages of ICT: depression, anxiety and problematic screen-driven actions
4. Does CyberParks respond to the *End of Outdoor Anthropos*? Can it reverse the condition?

Part II: Co-Creation as planned behavior

1. CyberParks as an *adjucment* to contemporary outdoor behaviours, communications, activity patterns etc.
2. Identification of different types of Technologies of Space and Co-creation approaches
3. Cases and spesification of outcomes of co-creation approaches

Part III: What kind of Technologies allow for the interiorization of *Anthropos in public space*?

1. Anthropogenic Spaces and engagement with the public
2. Aspects of localised knowledge and leverage of human cognition and creativity
3. Are CyberParks such spaces?

Conclusions

Learning goals

1. After this module participants will have been embeded in a critical inquire of ICT benefits
2. After this module participants will be introduced on a series of Outdoor Technologies of Space.
3. After this module participants will be able to shift the focus of contemporary co-creation methods towards the human (the Anthropos)
4. After this module participants will be able to attempt imagine their roles in outdoor urban space development as co-designers or initiators of an ICT-mediated landscape
