Public Space as Theatre

A photograph of Richard Sennett, an older man with white hair and glasses, smiling. He is wearing a grey blazer over a dark shirt. The background is a blurred crowd of people, suggesting a public event or gathering.

**A city is a place where people
can learn to live with strangers,
to enter into the experiences
and interests of unfamiliar lives.**

Medialab Prado In the Air

PHYSICAL PROTOTYPE

It is a prototype of what we have called a “diffuse façade” a massive indicator of the air’s components through a changing cloud.

Built in Medialab Prado with water vapor diffusers, at the same time as informing the passerby of the level of each component in the air it charges the microclimate around reducing the temperature in the summer and humidifying the environment in

INFORMATION CODE

The prototype shows the data the nearest sensor station. In the case of Medialab Prado it is Recoletos Station.

De lichtshow van Daan Roosegaarde op het Museumplein laat zien hoe hoog het water in Amsterdam zou komen als er geen dijken zouden zijn. Roosegaarde spreekt van een 'virtuele overstroming'. Nee maar, een kunstwerk gaat ons vertellen dat we Eigenlijk Onder De Zeespiegel Wonen! Wie had dat gedacht! En eigenlijk best griezelig, als je er zo mee geconfronteerd wordt, met dat onder de zeespiegel wonen. #purekitsch
